Construction Supervision

**Owner**  
The New York Hall of Science

**Date of Completion**  
1999

Tech Gallery

Creative use of display and graphics systems has allowed us to develop distinctive retail and interior designs for museums and cultural facilities. At the new Science Shop integrating signage and casework with creative materials helped to enhance the store's theme of introducing children to the world of science. A similar design approach for the Tech Gallery helped transform an under-utilized circulation area into a popular visitor destination. The on-line display counters invite children and adults to surf the internet and learn more about computers.
